PLANS NEW CABLES TO SOUTH AMERICA

Western Union to Also Look Over Continent with Idea of Land Lines

MANAGERS EXPECT A GREAT EXPANSION

Company's Earnings Have Been Large Enough to Pay for the Proposed Extension Out of the Surplus Which Has Accumulated.

NEW YORK, Oct. 28.—The Western Union Telegraph company is planning to enter South America on a big scale, and an expedition will be sent out next month to prepare the groundwork through a comprehensive examination of the field. Details of the plan have not been worked out, but enough is known to make possible the statement that the company will work in co-operation with the department of state. It is understood, also, that the construction of new telegraph lines, extending out from Buenos Aires, will be looked after by the American International corporation, provided that the report submitted by the expedition to the boards of directors of the two companies meet with approval. It is learned that in recent months

For Sale

Ford roadster, new last April. Run only 700 miles. Complete speedometer, foot throttle, and steering device. In first-class condition.

A GOVERNMENT BOND

is a sure thing. So are our annuity bonds, which pay a fixed income as long as you live, as true as you live. Send for rates. National Life Ins. Co., of Vt. (Mutual) 67th year.—ALBERT C. LAIRD, Special Agent, 8 Crosby Block.

the directors have been studying the telegraphic systems between the continents with the idea of branching out. The presence of eight cables between this country and Europe persuaded them that there was scarcely room for additional lines under the Atlantic on a profitable basis, and it was thought that the business emanating from Eastern Asia did not as yet call for additions to the existing cable lines in that direction.

South American prospects then received chief attention. With commercial business from Argentina, Brazil and Chile growing steadily, it was seen, according to information obtained yesterday in reliable quarters, that the Western Union should enter that field. The company at present has no inlet to South America. Its cable line, running furthest south, reaches Havana only. Telegraphic messages for South American cities go chiefly by way of Galveston, then across to the western coast over the lines of domestic companies, and are picked up by the Central and South American Telegraph company for distribution in the Southern Continent.

The exploring party will consist of officers of the Western Union and presumably of the American International corporation, together with engineers of both companies. It is expected that Newcomb Carlton, president of the Western Union, will go in person to look into the situation. It could not be learned yesterday whether a representative of the state department would accompany the party, but the result will be awaited with much interest at Washington.

If the Western Union decides that the time is ripe for the new undertaking, preparations will be made for continuing the Havana cable direct to Buenos Aires. It is believed also that a line will ultimately be laid from New York to some South American city. Plans for the land lines in South America will depend, of course, largely on conditions the party finds, and no forecasts as to that part of the work can yet be obtained.

The schedule of the party indicates that the field on the Pacific side will receive as careful study as the territory to be served on the East. The investigators will leave this city on the Western Union's new cable ship, the Lord Kelvin, and will go through the Panama canal. From Panama the vessel will proceed to Valparaiso, Chile, and there the party will disembark for a trip across to Buenos Aires on the Trans-Andean railway, while the ship will sail around the Horn. The party expects to spend the better part of two months on the work.

Cable men estimated yesterday that the cost of a line from New York to Buenos Aires, with the necessary equipment, would be in the neighborhood of \$7,000,000. If the Western Union management should desire the new project could be paid for out of surplus earnings, although it is expected that new capital will be raised if the plan goes through. The company last June had a maintenance reserve of nearly \$11,000,000 and a surplus of close to \$19,000,000. Since then earnings have increased substantially, and it is expected that the surplus account by the end of this year will approach \$25,000,000.

VICTIMS OF FARNHAM FIRE.

Child from Swanton and Former St. Albans Man Burned to Death.

ST. ALBANS, Oct. 28.—Among the victims of the fire at Farnham, Quebec, Thursday Samuel Daniels, for many years a resident of this city, and Bernard Phoenix, 5, son of Oliver Phoenix of Swanton, Mr. Daniels was born in St. Albans and learned the printer's trade in the Messenger office. He was 58 years old and had been in poor health a long time, having been in the hospital of the Farnham institution the past seven years. It was reported that the mother of L. M. Papeau of Swanton was missing, but she was saved and had been taken to a hospital, probably in Montreal.

VISITED BY TAMMANYITES.

Big Delegation Brought in Special Trains to Shadow Lawn.

LONG BRANCH, N. J., Oct. 28.—A double celebration, "Woodrow Wilson day" and "Empire state day," was in progress at Shadow Lawn today. While Democratic meetings in honor of the President were being held in other states Mr. Wilson prepared an address for delivery before delegations of organized Democrats, Independents, Progressives and women and children, most of them from New York. Two special trains brought a big delegation of Tammany Democrats from New York.

On a farm conducted by the municipality of Berlin, cows are being milked in the field by electrical machines deriving their power through cables.

PRISON WARDENSHIP

WAITS ON ELECTION

Successor to Osborne at Sing Sing Left Open Until the Governorship Is Made Certain.

OSSENING, N. Y., Oct. 28.—Superintendent of Prisons Carter, after a short visit here, said he had no announcement to make regarding the appointment of a successor to Thomas Mott Osborne as warden.

"There is really nothing new on the subject," was the way he put it. About the prison it is generally conceded that the superintendent will make no appointment until after the coming election. Political reasons urge such a course, for if Gov. Whitman should chance to be defeated it might be expected that Mr. Scabury would oust a Whitman appointee to make way for a man of his own choice. Under these conditions it would be almost impossible to get the right sort of man to take the job for so short a tenure.

George W. Kirchwey, who served as warden during Mr. Osborne's temporary resignation while the Weeks trial was on, was at Sing Sing Wednesday, and gave it plainly to be understood that he is not a candidate. Although the prisoners would welcome him, his known sympathy with the Osborne administrative methods would militate against him in any event.

At the parole board meeting twelve applications for parole were allowed out of twenty-two cases presented.

SAID MAINE KILLED

RELATIVE FOR CASH

Saw Man Counting Money, Barker Told Police — House Burned After Rhode Island Murder.

WESTERLY, R. I., Oct. 28.—John Barker and Welcome Maine, charged with the murder of Thomas Dorr Maine at his home in Hopkinton, were given a hearing before Judge Williams here yesterday.

Capt. Monahan, a Providence police inspector, testified that Barker made a confession to him at the Kingston jail, a short time after the arrest.

Capt. Monahan said Barker claimed that he went to the house with Welcome Maine, a relative of Welcome. When they left the house they looked through a window and saw Thomas Maine sit down to a table and start to count some money.

Barker said that Welcome fired one shot through the window, but missed, and Thomas Maine came to the door with a lamp and asked what was the matter. Welcome Maine then shot him. The house was then burned by an overturned lamp. Welcome Maine took \$8 from the dead man's body.

Both were held for the grand jury without bail.

PAWTUXET RIVER

TO BE DIVERTED

Bed Needed for a Part of \$25,000,000 Reservoir—Immense Dam to Be Constructed.

PROVIDENCE, R. I., Oct. 28.—The Pawtuxet river, on the banks of which are \$20,000,000 worth of mill property, is to be diverted from its course by the Providence water supply board.

This is necessary before the building of the big reservoir dam can be started, as the dam will run across the river bed. At the point where the dam is to be built, the Pawtuxet runs through the middle of a valley about 3,000 feet in width, with high hills on either side.

The engineers will divert the stream to one side of the valley and build a permanent watergate there to handle the flow. This gate, when the dam is built, will form a part of the main masonry structure.

The length of the main dam will be about 3,400 feet and its maximum height 260 feet. At some points it will be necessary to go down 80 feet into the ground to find a foundation to bear the great weight of masonry that will be erected to hold back the 37,000,000 gallons of water that the proposed reservoir will store. The cost will be \$25,000,000.

NO LIQUORS BY MAIL.

Emphatic Order from Department to Postmasters of Country.

WASHINGTON, Oct. 28.—Warning to postmasters that under no circumstances may intoxicating liquors be accepted for transportation through the mails was sent out from the postoffice department today. Numerous reports had come recently of the mailing of liquors.
